

# Science in your school

Think about leadership, curriculum coverage, CPD, assessment, practical science, working scientifically, progression, science capital, school visits, resources, the profile of science.....

HELENRSRING SEP 28, 2020 06:25PM

## What is going well in science teaching and learning at your school?

Good Science teaching across the school with the use of floor books. Strong Science leaders who have clear ideas for the rest of the school. PSQM outreach achieved. TAPS being used

**It is timetabled and being taught. Floor books have been introduced more widely across the school.**

**Practical science lessons across the school not extra English**

**Teachers are willing to try new things**

## What is not going so well in science teaching and learning at your school?

**Need to develop assessment in science further but I have the knowledge of TAPS and action plan in place- it's on hold slightly due to covid.**

Timetabled time for science can be difficult at times due to an equal push on foundation subjects. Trying to stress that Science is a CORE subject and needs dedicated time!

Still not always taught weekly, sometimes blocked due to time restrictions with new afternoon session times because of COVID

## Need a consistent approach to Afl

## What questions do you have about science teaching and learning?

## What can we do about careers?

How about 1001 inventions to the city

### Home - 1001 Inventions

Ibn Sina, or Avicenna, lived in Hamadan and Jurjan from 980 to 1037 CE, and acquired great fame in mediaeval European medicine. His encyclopaedic book *Al Qanun Fi Al-Tibb* (The Canon of Medicine) was translated into Latin at the end of the 12th century CE, and became a reference source for medical studies in the universities of Europe for 500 years!

1001 INVENTIONS

Teaching science remotely has been difficult. How do you teach science effectively when there can be a lack of resources/opportunity for practical engagement.

*Give a bit more detail- Is this just about kit? — TINA249*

Any advice for getting good resources into school, websites etc. We have a very small budget
