

# Science in your school

Think about leadership, curriculum coverage, CPD, assessment, practical science, working scientifically, progression, science capital, school visits, resources, the profile of science.....

HELENRSRING SEP 28, 2020 06:25PM

## What is going well in science teaching and learning at your school?

---

Science is far more practical than it has ever been. We have moved away from recording everything in writing

We have done a recent staff meeting and teachers are confident and enjoying teaching science

**Teachers feel more confident using a variety of resources**

## What is not going so well in science teaching and learning at your school?

---

After school clubs have had to stop, getting the two science leaders together, we've only just been given a budget too

The pandemic is affecting what we can achieve. Stem club isn't happening and resources are stretched.

## What questions do you have about science teaching and learning?

---

**How can we best evidence practical activities without the need for photographs?**
